FraudLens

Claims / MH12EX9221

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case case-03dd3c967b5b · Report 22 Oct 2026, 03:18:43 UTC

Assessment incomplete

Low	Medium	High

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Saved model routing · Partial analysis · human review required

Required check coverage is incomplete or was not recorded.

This assessment covers only the saved run and evidence. Earlier reports remain historical when new evidence arrives. No heuristic score is a calibrated fraud probability.

One-minute case summary

Claims application for MH12EX9221. Declared claim: INR 20,000. 1 saved photograph(s); 0 recorded concern finding(s). Applicant statements and automated observations require independent review.

Saved evidence preview

Main supported findings

No concerning finding was recorded. This does not clear missing or unavailable checks.

Evidence / check coverage — separate from risk

Photographs	Required execution coverage	Required unresolved inputs
1	3 completed check(s)	6 unresolved check(s)

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

Recommended reviewer action

Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.

Submitted facts · Applicant statements

Field	Declared / recorded value
Registration	MH12EX9221
Case type	claims
Submitted	22 Oct 2026, 03:14:53 UTC
Applicant	Fictional Live Validation
Make	Volkswagen
Model	Golf
Variant	Fictional validation example
Year	2018
Policy reference	VALIDATION-CLAIMS-2026
Claimed amount (INR)	20000.0
Insured declared value (INR)	400000.0
Declared incident location	Pune
Declared incident time	2026-10-20T10:00:00+05:30
Applicant declaration	Fictional software validation case. The sample photograph shows rear-panel damage; registration, policy, incident date/location and amount are synthetic test declarations, not facts established by this photograph. Assess only the available evidence.

Labeled photographs · evidence overview

Photograph 1

Included in this analysis.

Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

Identity

01 / Registration reading

1 inconclusive

Compare readable registration text with the applicant declaration.

Evidence examined: Photograph 1

Evidence	Declared plate	Extracted text	Comparison	OCR confidence
Photograph 1	MH12EX9221	Unreadable / not recorded	no_text_detected	Not returned

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: OCR ran but detected no text. Plate legibility is unverified; this is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

History and relationships

02 / Internal photograph reuse

1 inconclusive

Compare submitted photographs with the indexed internal evidence corpus.

Evidence examined: Photograph 1

Submitted photograph

Authorized saved reference

No authorized image was frozen in this snapshot.

Evidence	Measured comparison
Photograph 1	images compared: 0

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: duplicate hamming concern = 8; duplicate cosine concern = 0.95; duplicate cosine floor = 0.9; duplicate cosine inconclusive = 0.88

Interpretation: No other images exist in the corpus yet to compare against.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

03 / External photograph matches

1 no concern found

Look for matching photographs in the configured external reference corpus.

Evidence examined: Photograph 1

Submitted photograph

Authorized saved reference

No authorized image was frozen in this snapshot.

Evidence	Measured comparison
Photograph 1	cosine similarity: 0.7969; hamming distance: 20; corpus size: 400

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: No matching image found in the external image index (closest semantic similarity 0.80).

No numeric contribution. 1 finding(s) cited by the agent.

Uncertain: this observation does not establish the full application or intent.

04 / Shared identifiers

1 no concern found

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence examined: Case / linked records

Relationship	Saved observation
Linked cases	No linked-case graph was saved; see the recorded interpretation below.

Saved decision parameters: min shared identifiers = 2; min vehicles per claimant = 3

Interpretation: No other case shares identifying details with this one.

No numeric contribution. 1 finding(s) cited by the agent.

Uncertain: this observation does not establish the full application or intent.

05 / Earlier inspection link

1 not applicable

Compare linked underwriting and claims evidence where a baseline exists.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not applicable	No prior break-in inspection is on record for this vehicle, so there is no declared baseline for this claim to contradict.

Saved decision parameters: window days = 30

Interpretation: No prior break-in inspection is on record for this vehicle, so there is no declared baseline for this claim to contradict.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

06 / Damage history

1 not applicable

Compare recorded damage severity across linked observations.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not applicable	No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

Saved decision parameters: same panel window days = 90

Interpretation: No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

Provenance

07 / Capture metadata

1 inconclusive

Examine extracted capture metadata and its availability or consistency.

Evidence examined: Photograph 1

Evidence	Captured time	GPS	Camera	Software
Photograph 1	Not recorded	Not recorded	Not recorded	Not recorded

Evidence	Usable comparison
Photograph 1	exif present: False

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts.

Saved decision parameters: metadata gps concern km = 100.0; metadata timestamp inconclusive hours = 48.0

Interpretation: This image has no EXIF metadata - common for uploads via WhatsApp, a browser, or a phone's default sharing pipeline. Capture time, location and authenticity remain unverified; absence is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

08 / Content credentials

1 inconclusive

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	credentials present: False

Interpretation: No embedded C2PA content credentials were found. Authenticity cannot be established from this check; absence is not evidence of fraud.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

09 / Experimental synthetic image check

1 inconclusive

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	artificial probability: 0.68; reporting band: elevated; model: umm-maybe/AI-image-detector; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. An AI-image detector scored this image 0.68 on its artificial class. This detector is recorded for measurement only and does not contribute to the...

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

10 / Experimental image editing check

1 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	calibrated: False; concern threshold: 0.5378484324249928; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Digital-edit analysis ran but has not been calibrated against this corpus, so its score is recorded without a verdict.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

Context

11 / Scene, time and place

1 not run

Compare available time, place, weather and scene observations.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not run	No comparison result was produced because the required case inputs or context were unavailable.

Saved decision parameters: shadow bearing concern deg = 90.0; elevation short above = 45.0; elevation medium above = 20.0; civil twilight deg = -6.0; lighting night conflict deg = 15.0; rain mm = 1.0; rainy hour mm = 0.5; dry mm = 0.1; overcast cloud pct = 70.0; clear cloud pct = 30.0

Interpretation: No comparison result was produced because the required case inputs or context were unavailable.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

12 / Damage and claimed amount

1 no concern found

Assess whether recorded damage observations support the incident account.

Evidence examined: Case / linked records

Evidence / declaration	Recorded observation
Case-level observation	claim amount inr: 20000.0; severity used: moderate; observed severities: ['moderate']; ratio to ceiling: 0.286; ceiling tolerance: 1.5

Structured comparison of saved observations only. No damage boxes, heatmap, map or annotation was available; none has been invented.

Saved decision parameters: ceiling tolerance = 1.5

Interpretation: The claim of ₹20,000 is consistent with the moderate damage visible in the photographs.

No numeric contribution. 1 finding(s) cited by the agent.

Uncertain: this observation does not establish the full application or intent.

Economic

13 / Garage billing pattern

1 inconclusive

Summarize the repairing garage billing pattern against a research benchmark.

Evidence examined: Case / linked records

No usable measurements were saved.

The implemented billing band is a research benchmark, not a verified legal rule. This is a garage pattern, not a claimant fraud probability.

Saved decision parameters: threshold band low = 45000.0; threshold band high = 50000.0; threshold garage concern pct = 40.0; threshold min garage claims = 5

Interpretation: Repairer identity is missing; no garage billing pattern can be attributed.

No numeric contribution. 0 finding(s) cited by the agent.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

Checks outside this run’s applicable policy

Registered check	Result / use
Experimental baseline check	Not applicable to this policy / no contribution
Photographic coverage	Not applicable to this policy / no contribution

How the assessment was calculated

The agent selects a routing band from the recorded evidence. Check weights are context, not an additive production score.

Numeric score: not computed. Production model routing does not assign numerical contributions.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Internal photograph reuse	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
External photograph matches	No eligible concern contribution	No numeric contribution. 1 finding(s) cited by the agent.
Capture metadata	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Content credentials	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Scene, time and place	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Registration reading	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Experimental synthetic image check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental image editing check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Garage billing pattern	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage and claimed amount	No eligible concern contribution	No numeric contribution. 1 finding(s) cited by the agent.
Shared identifiers	No eligible concern contribution	No numeric contribution. 1 finding(s) cited by the agent.
Earlier inspection link	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage history	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.

Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

Partial analysis: Required check coverage is incomplete or was not recorded.

- Scores are heuristic; independent detection accuracy and claimant intent are not established.
- INR 50,000 is a preserved research billing benchmark; current legal applicability and insurer procedures are unverified.
- Check findings use local computations and recorded observations; they do not establish successful fresh model adjudication.
- Production check implementation revision: production-checks-2026-10-20-v3. This is separate from the recorded agent policy version.

Next reviewer action: Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.
