FraudLens

Claims / MH12EX9241

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case case-e4f345a50f26 · Report 22 Oct 2026, 14:40:00 UTC

Assessment incomplete

Low	Medium	High

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Saved model routing · Partial analysis · human review required

Required check coverage is incomplete or was not recorded.

This assessment covers only the saved run and evidence. Earlier reports remain historical when new evidence arrives. No heuristic score is a calibrated fraud probability.

One-minute case summary

Claims application for MH12EX9241. Declared claim: INR 20,000. 1 saved photograph(s); 1 recorded concern finding(s). Applicant statements and automated observations require independent review.

Saved evidence preview

SHADOW ONLY · candidate concern R: 0.8; material coverage C: 0.5. Unvalidated; production risk and human review unchanged.

Main supported findings

• This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).

Evidence / check coverage — separate from risk

Photographs	Required execution coverage	Required unresolved inputs
1	5 executed check(s)	3 unresolved check(s)

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

Material missing evidence

External photograph matches, Scene, time and place, Registration reading

Recommended reviewer action

System routing: escalate. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.

Human decision for this analysis: request more evidence

Submitted facts · Applicant statements

Field	Declared / recorded value
Registration	MH12EX9241
Case type	claims
Submitted	Not recorded
Applicant	Fictional Normal Claims Presentation
Make	Fictional sample vehicle
Model	Unverified model
Variant	VXI
Year	2025
Policy reference	FICTIONAL-NORMAL-2026
Claimed amount (INR)	20000.0
Insured declared value (INR)	500000.0
Declared incident location	Sample Lane, Example Nagar, Pune, Maharashtra
Declared incident time	2026-10-21T04:00:00Z
Applicant declaration	FICTIONAL PRESENTATION CASE. Authorized existing sample photograph shows rear body-panel scuffs and a dent. Applicant identity, vehicle identity, policy, incident date, place and INR 20000 amount are fictional software test declarations. The image does not authenticate them. Request missing evidence where needed; do not infer verified repair costs.

Labeled photographs · evidence overview

Authorized submitted sample (offline replay)

Included in this analysis.

Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

Identity

01 / Registration reading

1 inconclusive

Compare readable registration text with the applicant declaration.

Evidence examined: Authorized submitted sample (offline replay)

Evidence	Declared plate	Extracted text	Comparison	OCR confidence
Authorized submitted sample (offline replay)	MH12EX9241	Unreadable / not recorded	no_text_detected	Not returned

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: OCR ran but detected no text. Plate legibility is unverified; this is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

History and relationships

02 / Internal photograph reuse

1 concern

Compare submitted photographs with the indexed internal evidence corpus.

Evidence examined: Authorized submitted sample (offline replay)

Submitted photograph

Authorized saved reference

No authorized image was frozen in this snapshot.

Evidence	Measured comparison
Authorized submitted sample (offline replay)	cosine similarity: 1.0; hamming distance: 0; images compared: 1473

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: hamming concern = 8; cosine concern = 0.95; cosine floor = 0.9; cosine inconclusive = 0.88; top k = 10

Interpretation: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).

No numeric contribution. 1 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

03 / External photograph matches

1 inconclusive

Look for matching photographs in the configured external reference corpus.

Evidence examined: Authorized submitted sample (offline replay)

Submitted photograph

Authorized saved reference

No authorized image was frozen in this snapshot.

Evidence	Measured comparison
Authorized submitted sample (offline replay)	cosine similarity: 0.9116; hamming distance: 24; corpus size: 400

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: This image resembles an image in an external image index (semantic similarity 0.91) but not closely enough to conclude it is the same photo.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

04 / Shared identifiers

1 no concern found

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence examined: Case / linked records

Relationship	Saved observation
Linked cases	No linked-case graph was saved; see the recorded interpretation below.

Interpretation: No other case shares identifying details with this one.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

05 / Earlier inspection link

1 not applicable

Compare linked underwriting and claims evidence where a baseline exists.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not applicable	No prior break-in inspection is on record for this vehicle, so there is no declared baseline for this claim to contradict.

Interpretation: No prior break-in inspection is on record for this vehicle, so there is no declared baseline for this claim to contradict.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison. No applicable historical comparison is established; this is not a passed history check.

06 / Damage history

1 not applicable

Compare recorded damage severity across linked observations.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not applicable	No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

Interpretation: No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison. No applicable historical comparison is established; this is not a passed history check.

Provenance

07 / Capture metadata

1 inconclusive

Examine extracted capture metadata and its availability or consistency.

Evidence examined: Authorized submitted sample (offline replay)

Evidence	Captured time	GPS	Camera	Software
Authorized submitted sample (offline replay)	Not recorded	Not recorded	Not recorded	Not recorded

Evidence	Usable comparison
Authorized submitted sample (offline replay)	exif present: False

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts.

Interpretation: This image has no EXIF metadata - common for uploads via WhatsApp, a browser, or a phone's default sharing pipeline. Capture time, location and authenticity remain unverified; absence is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

08 / Content credentials

1 inconclusive

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence examined: Authorized submitted sample (offline replay)

Evidence / declaration	Recorded observation
Authorized submitted sample (offline replay)	credentials present: False

Interpretation: No embedded C2PA content credentials were found. Authenticity cannot be established from this check; absence is not evidence of fraud.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

09 / Experimental synthetic image check

1 inconclusive

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence examined: Authorized submitted sample (offline replay)

Evidence / declaration	Recorded observation
Authorized submitted sample (offline replay)	artificial probability: 0.267; reporting band: low; model: umm-maybe/AI-image-detector; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. An AI-image detector scored this image 0.27 on its artificial class. This detector is recorded for measurement only and does not contribute to the...

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

10 / Experimental image editing check

1 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence examined: Authorized submitted sample (offline replay)

Evidence / declaration	Recorded observation
Authorized submitted sample (offline replay)	calibrated: False; concern threshold: 0.5378484324249928; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Digital-edit analysis ran but has not been calibrated against this corpus, so its score is recorded without a verdict.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Context

11 / Scene, time and place

1 not run

Compare available time, place, weather and scene observations.

Evidence examined: Case / linked records

Saved state	Missing requirement / reason
Not run	No comparison result was produced because the required case inputs or context were unavailable.

Interpretation: No comparison result was produced because the required case inputs or context were unavailable.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

12 / Damage and claimed amount

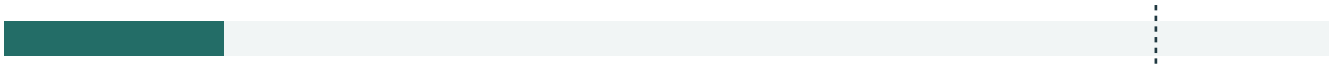

1 no concern found

Assess whether recorded damage observations support the incident account.

Evidence examined: Case / linked records

Saved input / benchmark	Value
Observed severity	moderate
Declared amount (INR)	20000.0
Configured heuristic band (INR)	[20000.0, 70000.0]
Concern threshold (INR)	105000.0

Declared INR 20,000 | Heuristic concern threshold INR 105,000

0 INR

120,750 INR (axis maximum)

Configured severity/amount research heuristic only. No independent repair estimate or invoice has been verified; vehicle value, parts and labour can differ.

Interpretation: Within the configured moderate severity/amount heuristic band; no independent repair estimate or invoice has been verified.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

Economic

13 / Garage billing pattern

1 inconclusive

Summarize the repairing garage billing pattern against a research benchmark.

Evidence examined: Case / linked records

No usable measurements were saved.

The implemented billing band is a research benchmark, not a verified legal rule. This is a garage pattern, not a claimant fraud probability.

Interpretation: Repairer identity is missing; no garage billing pattern can be attributed.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

Candidate assessment — SHADOW ONLY

Unvalidated heuristic comparison. This does not replace production routing, the risk bar or human review. Neither axis is a fraud probability.

Concern index R	Material coverage C	Candidate action
0.8	0.5	request_evidence

R = 1 - product(1 - grouped maximum). C = sufficient applicable material requirements / applicable material requirements. Mandatory gaps prevent candidate clearance regardless of the average.

Correlation group	Saved maximum a × e
vehicle_history	0.0
provenance	0.0
incident	0.0
identity	0.0
image_reuse	0.8

Worked saved calculation: R = 1 - (1.0) × (1.0) × (1.0) × (1.0) × (0.2) = 0.8. C = 3 / 6 = 0.5.

Check / group	Strength / parameter	Coverage sufficient
ai_generation / None	0.0 / 0.0	False
baseline_linkage / vehicle_history	0.0 / 0.4	True
c2pa_credentials / provenance	0.0 / 0.3	False
damage_plausibility / incident	0.0 / 0.4	True
digital_edit / None	0.0 / 0.0	False
entity_graph / identity	0.0 / 0.4	True
exif_metadata / provenance	0.0 / 0.3	False
external_corpus / image_reuse	0.0 / 0.8	False
internal_duplicate / image_reuse	1.0 / 0.8	True
plate_ocr / identity	0.0 / 0.6	False
scene_consistency / incident	0.0 / 0.6	False
severity_progression / vehicle_history	0.0 / 0.4	True
threshold_gaming / None	0.0 / 0.0	False

Mandatory gaps: external_corpus, scene_consistency, plate_ocr. Garage alerts are separate. All candidate operating points are unvalidated.

How the assessment was calculated

The agent selects a routing band from the recorded evidence. Check weights are context, not an additive production score.

Model output (unchanged)	Effective system routing	Guard / human boundary
escalate_siu / escalate	escalate	material-evidence-2026-10-22-v2. Human approval/rejection is separate.

Numeric score: not computed. Production model routing does not assign numerical contributions.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Internal photograph reuse	Eligible saved concern(s)	No numeric contribution. 1 finding(s) cited by the agent.
External photograph matches	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Capture metadata	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Content credentials	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Scene, time and place	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Registration reading	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Experimental synthetic image check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental image editing check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Garage billing pattern	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage and claimed amount	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Shared identifiers	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Earlier inspection link	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage history	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.

Recorded override: Material-evidence guard: model output retained; incomplete assessment cannot route as actionable clearance.

Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

Partial analysis: Required check coverage is incomplete or was not recorded.

- OFFLINE REPLAY of previously saved live results; no fresh inference or production snapshot update.
- Scores are heuristic; independent detection accuracy and claimant intent are not established.
- INR 50,000 is a preserved research billing benchmark; current legal applicability and insurer procedures are unverified.
- Check findings use local computations and recorded observations; they do not establish successful fresh model adjudication.

Next reviewer action: System routing: escalate. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.
