FraudLens

Underwriting / MH12EX1203

CONTROLLED LAYOUT FIXTURE · NO LIVE AI VALIDATION

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case visual-underwriting · Report 22 Oct 2026, 14:40:00 UTC

Assessed risk: Medium

Low	**Medium**	High

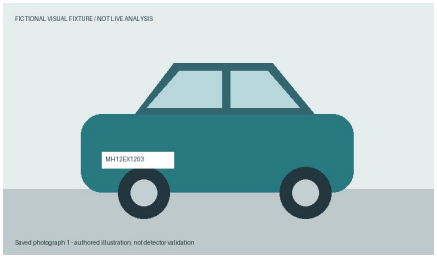

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Saved model routing · Recorded analysis · human review required

This assessment covers only the saved run and evidence. Earlier reports remain historical when new evidence arrives. No heuristic score is a calibrated fraud probability.

One-minute case summary

Underwriting application for MH12EX1203. 6 saved photograph(s); 1 recorded concern finding(s). Applicant statements and automated observations require independent review.

Saved evidence preview

SHADOW ONLY · candidate concern R: 0.8; material coverage C: 1.0. Unvalidated; production risk and human review unchanged.

Main supported findings

• The saved image comparison exceeded the recorded similarity rule. A reviewer should verify the matched photograph.

Evidence / check coverage — separate from risk

Photographs	Required execution coverage	Required unresolved inputs
6	5 executed check(s)	0 unresolved check(s)

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

Material missing evidence

No unresolved material check recorded. Optional evidence limitations still apply.

Recommended reviewer action

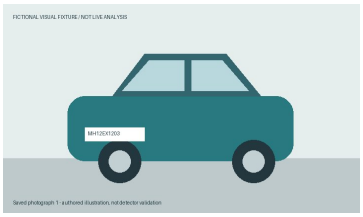

System routing: escalate. A reviewer must independently decide the application.

Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

Identity

01 / Registration reading

1 no concern found

Compare readable registration text with the applicant declaration.

Evidence examined: Photograph 3

Evidence	Declared plate	Extracted text	Comparison	OCR confidence
Photograph 3	MH12EX1203	MH12EX1203	match	1.0

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: The saved registration text is shown alongside the declaration for review.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

02 / Photographic coverage

1 inconclusive

Inspect declared photographic coverage; view labels require verification.

Evidence examined: Case / linked records

Evidence / declaration	Recorded observation
Case-level observation	distinct views: 4; required views: 4; plate seen: True; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Photo-slot labels and visual variety do not establish that all views show one vehicle.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Uncertain: the recorded state does not establish an applicable clean or concerning conclusion.

History and relationships

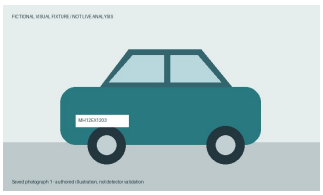

03 / Internal photograph reuse

1 concern

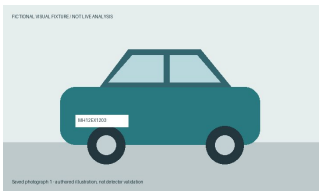

Compare submitted photographs with the indexed internal evidence corpus.

Evidence examined: Photograph 1

Submitted photograph

Authorized saved reference

Evidence	Measured comparison
Photograph 1	cosine similarity: 0.97; hamming distance: 2; images compared: 12

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: duplicate hamming concern = 8; duplicate cosine concern = 0.95; duplicate cosine floor = 0.9; duplicate cosine inconclusive = 0.88

Interpretation: The saved image comparison exceeded the recorded similarity rule. A reviewer should verify the matched photograph.

No numeric contribution. 1 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

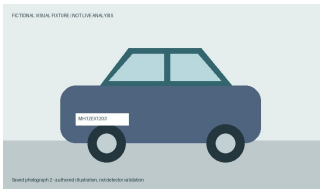

04 / External photograph matches

1 no concern found

Look for matching photographs in the configured external reference corpus.

Evidence examined: Photograph 2

Submitted photograph

Authorized saved reference

No authorized image was frozen in this snapshot.

Evidence	Measured comparison
Photograph 2	cosine similarity: 0.83; hamming distance: 18; corpus size: 24

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: The saved reference-corpus comparison did not reach its concern thresholds.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

05 / Shared identifiers

1 no concern found

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence examined: Case / linked records

1 recorded linked case(s); the graph shows up to four. Shared identifiers have innocent explanations and are not proof of fraud.

Interpretation: A single shared contact has innocent explanations; this relationship does not establish fraud.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

Provenance

06 / Capture metadata

1 no concern found

Examine extracted capture metadata and its availability or consistency.

Evidence examined: Photograph 1

Evidence	Captured time	GPS	Camera	Software
Photograph 1	2026-10-19T08:00:00+00:00	Recorded	Fixture camera	Not recorded

Evidence	Usable comparison
Photograph 1	gps distance km: 0.4; exif present: True

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts.

Interpretation: The saved capture fields are available. Their authenticity has not been independently established.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

07 / Content credentials

1 no concern found

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	credentials present: True; validation state: Valid

Interpretation: Embedded credentials validated under the saved local policy; the incident itself is not verified.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

08 / Experimental synthetic image check

1 inconclusive

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	artificial probability: 0.87; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: An experimental classifier output was saved but excluded from routing.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

09 / Experimental image editing check

1 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	combined score: 0.24; calibrated: False; concern threshold: 0.6; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: Experimental image-edit observations were excluded from routing.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Context

10 / Scene, time and place

1 no concern found

Compare available time, place, weather and scene observations.

Evidence examined: Photograph 1

Evidence / declaration	Recorded observation
Photograph 1	declared time basis: aware_instant; observed shadow direction: NW; expected shadow direction: NW; shadow bearing difference deg: 12; weather status: consistent

Structured comparison of saved observations only. No damage boxes, heatmap, map or annotation was available; none has been invented.

Interpretation: Recorded scene observations are compatible with the declared account in this controlled fixture.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

11 / Experimental baseline check

1 inconclusive

Inspect observations against the actual underwriting declaration.

Evidence examined: Case / linked records

Evidence / declaration	Recorded observation
Case-level observation	declared condition: Disclosed damage; contradicting severity: minor; execution state: inconclusive

Experimental / excluded where the saved registered weight is zero. Raw classifier outputs are not fraud probabilities. View labels do not verify the same vehicle.

Interpretation: No absence-of-damage declaration was inferred from the underwriting application.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Checks outside this run’s applicable policy

Registered check	Result / use
Earlier inspection link	Not applicable to this policy / no contribution
Damage and claimed amount	Not applicable to this policy / no contribution
Damage history	Not applicable to this policy / no contribution
Garage billing pattern	Not applicable to this policy / no contribution

Candidate assessment — SHADOW ONLY

Unvalidated heuristic comparison. This does not replace production routing, the risk bar or human review. Neither axis is a fraud probability.

Concern index R	Material coverage C	Candidate action
0.8	1.0	investigate

R = 1 - product(1 - grouped maximum). C = sufficient applicable material requirements / applicable material requirements. Mandatory gaps prevent candidate clearance regardless of the average.

Correlation group	Saved maximum a × e
vehicle_history	0.0
provenance	0.0
incident	0.0
identity	0.0
image_reuse	0.8

Worked saved calculation: R = 1 - (1.0) × (1.0) × (1.0) × (1.0) × (0.2) = 0.8. C = 5 / 5 = 1.0.

Check / group	Strength / parameter	Coverage sufficient
ai_generation / None	0.0 / 0.0	False
baseline_corruption / None	0.0 / 0.0	False
baseline_linkage / vehicle_history	0.0 / 0.4	Optional / not applicable
c2pa_credentials / provenance	0.0 / 0.3	True
damage_plausibility / incident	0.0 / 0.4	Optional / not applicable
digital_edit / None	0.0 / 0.0	False
entity_graph / identity	0.0 / 0.4	True
exif_metadata / provenance	0.0 / 0.3	True
external_corpus / image_reuse	0.0 / 0.8	True
internal_duplicate / image_reuse	1.0 / 0.8	True
plate_ocr / identity	0.0 / 0.6	True
scene_consistency / incident	0.0 / 0.6	True
severity_progression / vehicle_history	0.0 / 0.4	Optional / not applicable
threshold_gaming / None	0.0 / 0.0	Optional / not applicable
view_completeness / None	0.0 / 0.0	Optional / not applicable

Mandatory gaps: None recorded. Garage alerts are separate. All candidate operating points are unvalidated.

How the assessment was calculated

The agent selects a routing band from the recorded evidence. Check weights are context, not an additive production score.

Model output (unchanged)	Effective system routing	Guard / human boundary
desk_review / escalate	escalate	material-evidence-2026-10-22-v2. Human approval/rejection is separate.

Numeric score: not computed. Production model routing does not assign numerical contributions.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Internal photograph reuse	Eligible saved concern(s)	No numeric contribution. 1 finding(s) cited by the agent.
External photograph matches	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Registration reading	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Capture metadata	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Content credentials	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Shared identifiers	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Scene, time and place	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage and claimed amount	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Garage billing pattern	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Earlier inspection link	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage history	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Experimental synthetic image check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental image editing check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Photographic coverage	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental baseline check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.

Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

- Controlled authored fixture only. The graphics do not demonstrate improved analysis accuracy.

Next reviewer action: System routing: escalate. A reviewer must independently decide the application.
