# FraudLens

## Claims / MH12VR4083

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case case-f400641b2afe · Report 27 Oct 2026, 18:15:00 UTC

## Review priority: MEDIUM

| Low | **Medium** ▼ | High |
|---|---|---|

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Local rules assessment. Completed local checks require independent review: internal photograph reuse, capture metadata. Review required because evidence is insufficient; this is not a finding of fraud.

Material evidence: 2 / 7 applicable requirements sufficient. request evidence for: incident context, registration reading, damage and claimed amount, shared identifiers, earlier inspection comparison.

### Assessment complete — additional evidence recommended

This assessment uses available local checks. AI-dependent checks were not performed.

### One-minute case summary

Claims application for MH12VR4083. Declared claim: INR 2,000. 4 saved photograph(s); 7 concern observation(s) across 2 check(s). Applicant statements and automated observations require independent review.

Saved evidence preview

### Findings supporting the display band

• Internal photograph reuse [image]: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).

• Capture metadata [image]: EXIF Software field indicates editing with 'Adobe Photoshop CS Windows'.

### Evidence / check coverage — separate from risk

| Photographs | Recorded required checks | Required unresolved inputs |
|---|---|---|
| 4 | 5 check record(s) | 5 unresolved check(s) |

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

A recorded result may be unavailable or inconclusive; it does not establish that a measurement succeeded.

### Material missing evidence

Scene, time and place, Registration reading, Damage and claimed amount, Shared identifiers, Earlier inspection link

## Submitted facts · Applicant statements

| Field | Declared / recorded value |
|---|---|
| Registration | MH12VR4083 |
| Case type | claims |
| Submitted | 27 Oct 2026, 18:06:18 UTC |
| Applicant | Fictional Local Viva Verification |
| Make | Chevrolet |
| Model | Classic |
| Variant | Archived licensed public photograph sample |
| Year | 2005 |
| Policy reference | FICTIONAL-LOCAL-VIVA-20261027 |
| Claimed amount (INR) | 2000.0 |
| Insured declared value (INR) | 500000.0 |
| Declared incident location | Fictional declared incident location |
| Declared incident time | 2026-10-26T12:00:00Z |
| Applicant declaration | FICTIONAL DISPOSABLE SOFTWARE VERIFICATION. Licensed archived photographs by Milkmandan, CC BY-SA 3.0; no current insured loss, ownership or readable mileage established. Gemini remains paused and is not used. This is a local rules workflow demonstration; no live AI completion is claimed. |

## Labeled photographs · evidence overview

Slot names are applicant assignments. Exact angle, same-vehicle identity and capture date have not been independently authenticated.

### Vehicle overview

Included in this analysis.

### Front registration

Included in this analysis.

### Damage overview

Included in this analysis.

### Damage closeup

Included in this analysis.

# Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

## Identity

### 01 / Registration reading

4 inconclusive

Compare readable registration text with the applicant declaration.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

| Evidence | Declared plate | Extracted text | Comparison | OCR confidence |
|---|---|---|---|---|
| Vehicle overview | MH12VR4083 | Unreadable / not recorded | no_text_detected | Not returned |
| Front registration | MH12VR4083 | Unreadable / not recorded | no_plate_candidate | Not returned |
| Damage overview | MH12VR4083 | Unreadable / not recorded | no_plate_candidate | Not returned |
| Damage closeup | MH12VR4083 | Unreadable / not recorded | no_plate_candidate | Not returned |

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: OCR ran but detected no text. Plate legibility is unverified; this is not itself suspicious. OCR detected text but no licence-plate-shaped candidate could be read. Plate legibility is unverified; this is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; evidence remains insufficient.

# History and relationships

## 02 / Internal photograph reuse

4 concern

Compare submitted photographs with the indexed internal evidence corpus.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Submitted photograph

Authorized saved reference

| Evidence | Measured comparison |
|---|---|
| Vehicle overview | cosine similarity: 1.0; hamming distance: 0; images compared: 34 |
| Front registration | cosine similarity: 1.0; hamming distance: 0; images compared: 34 |
| Damage overview | cosine similarity: 1.0; hamming distance: 0; images compared: 34 |
| Damage closeup | cosine similarity: 1.0; hamming distance: 0; images compared: 34 |

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: hamming concern = 8; cosine concern = 0.95; cosine floor = 0.9; cosine inconclusive = 0.88; top k = 10

Interpretation: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).

No numeric contribution. 4 finding(s) cited by the saved local rules policy.

Coverage: material requirement; sufficient for this comparison.

## 03 / External photograph matches

4 no concern found

Look for matching photographs in the configured external reference corpus.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

| Evidence | Measured comparison |
|---|---|
| Vehicle overview | cosine similarity: 0.6938; hamming distance: 30; corpus size: 400 |
| Front registration | cosine similarity: 0.542; hamming distance: 26; corpus size: 400 |
| Damage overview | cosine similarity: 0.6987; hamming distance: 30; corpus size: 400 |
| Damage closeup | cosine similarity: 0.5399; hamming distance: 28; corpus size: 400 |

No authorized matching reference photograph was saved. No visual match is fabricated.

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: No matching image found in the external image index (closest semantic similarity 0.69). No matching image found in the external image index (closest semantic similarity 0.54).

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

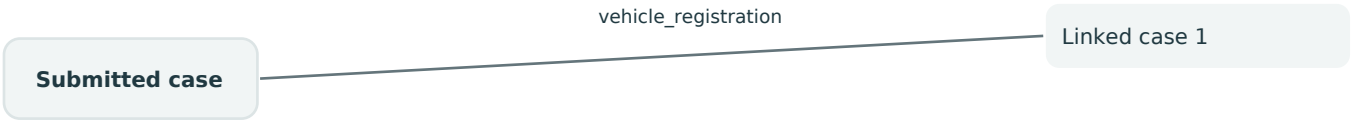

Coverage: material requirement; sufficient for this comparison.

## 04 / Shared identifiers

1 inconclusive

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence referenced: Case / linked records

1 recorded linked case(s); the graph shows up to four. Shared identifiers have innocent explanations and are not proof of fraud.

Interpretation: This case shares one identifier (vehicle_registration) with linked case. A single shared detail has innocent explanations - a family address, a shared contact number - and is not on its own evidence of a relationship.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; evidence remains insufficient.

## 05 / Earlier inspection link

1 inconclusive

Compare linked underwriting and claims evidence where a baseline exists.

Evidence referenced: Case / linked records

| Saved sequence | Date / days before claim | Recorded severity |
|---|---|---|
| Observation 1 | Not recorded | Not comparable |

Dates and severity labels are shown as recorded. No continuous physical damage percentage is inferred from labels or image area. Missing chronology or a comparable scale prevents a severity plot.

Interpretation: No inspection date could be compared against the declared loss.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; evidence remains insufficient.

## 06 / Damage history

1 not applicable

Compare recorded damage severity across linked observations.

Evidence referenced: Case / linked records

| Saved state | Missing requirement / reason |
|---|---|
| Not applicable | No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent. |

Interpretation: No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; sufficient for this comparison. No applicable historical comparison is established; this is not a passed history check.

# Provenance

## 07 / Capture metadata

3 concern, 1 inconclusive

Examine extracted capture metadata and its availability or consistency.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

| Evidence | Captured time | GPS | Camera | Software |
|---|---|---|---|---|
| Vehicle overview | Not recorded | Not recorded | Not recorded | Adobe Photoshop CS Windows |
| Front registration | Not recorded | Not recorded | Not recorded | Not recorded |
| Damage overview | Not recorded | Not recorded | Not recorded | Adobe Photoshop CS Windows |
| Damage closeup | Not recorded | Not recorded | Not recorded | Adobe Photoshop CS Windows |

| Evidence | Usable comparison |
|---|---|
| Vehicle overview | exif present: True |
| Front registration | exif present: False |
| Damage overview | exif present: True |
| Damage closeup | exif present: True |

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts. An editor tag records software, not what changed or whether a claim is fraudulent.

Interpretation: EXIF Software field indicates editing with 'Adobe Photoshop CS Windows'. This image has no EXIF metadata - common for uploads via WhatsApp, a browser, or a phone's default sharing pipeline. Capture time, location and authenticity remain unverified; absence is not itself suspicious.

No numeric contribution. 3 finding(s) cited by the saved local rules policy.

Coverage: optional / advisory; does not block material completeness.

## 08 / Content credentials

4 inconclusive

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

| Evidence / declaration | Recorded observation |
|---|---|
| Vehicle overview | credentials present: False |
| Front registration | credentials present: False |
| Damage overview | credentials present: False |
| Damage closeup | credentials present: False |

Interpretation: No embedded C2PA content credentials were found. Authenticity cannot be established from this check; absence is not evidence of fraud.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: optional / advisory; does not block material completeness.

### 09 / Experimental synthetic image check

1 not run

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence referenced: Case / linked records

| Saved state | Missing requirement / reason |
|---|---|
| Not run | Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing. |

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

### 10 / Experimental image editing check

4 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

| Saved experimental observations | Use in production |
|---|---|
| 4 Inconclusive record(s) | EXCLUDED / ZERO WEIGHT. Raw classifier measurements are retained in the saved record; they are not fraud probabilities. |

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Digital-edit analysis ran but has not been calibrated against this corpus, so its score is recorded without a verdict.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

## Context

### 11 / Scene, time and place

1 not run

Compare available time, place, weather and scene observations.

Evidence referenced: Case / linked records

| Saved state | Missing requirement / reason |
|---|---|
| Not run | AI-dependent interpretation was not performed in Local rules assessment mode. This is an evidence gap, not a passed check. |

Interpretation: AI-dependent interpretation was not performed in Local rules assessment mode. This is an evidence gap, not a passed check.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; evidence remains insufficient.

### 12 / Damage and claimed amount — 1 not run

Assess whether recorded damage observations support the incident account.

Evidence referenced: Case / linked records

| Saved state | Missing requirement / reason |
|---|---|
| Not run | AI-dependent interpretation was not performed in Local rules assessment mode. This is an evidence gap, not a passed check. |

Interpretation: AI-dependent interpretation was not performed in Local rules assessment mode. This is an evidence gap, not a passed check.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: material requirement; evidence remains insufficient.

## Economic

### 13 / Garage billing pattern — 1 inconclusive

Summarize the repairing garage billing pattern against a research benchmark.

Evidence referenced: Case / linked records

No usable measurements were saved.

The implemented billing band is a research benchmark, not a verified legal rule. This is a garage pattern, not a claimant fraud probability.

Interpretation: Repairer identity is missing; no garage billing pattern can be attributed.

No numeric contribution. 0 finding(s) cited by the saved local rules policy.

Coverage: optional / advisory; does not block material completeness.

### Checks outside this run’s applicable policy

| Registered check | Result / use |
|---|---|
| Experimental baseline check | Not applicable to this policy / no contribution |
| Photographic coverage | Not applicable to this policy / no contribution |

## How the assessment was calculated

HIGH: completed plate identity and image/history concerns. MEDIUM: other eligible concerns or material gaps. LOW: sufficient required evidence and no eligible concerns. Repeated correlated findings do not add up.

| Automated decision availability | Effective system routing | Guard / human boundary |
|---|---|---|
| Local rules assessment; AI-dependent interpretation not performed. | desk_review | local-rules-review-priority-2026-10-27-v1. Human approval/rejection is separate. |

Numeric score: not computed. The saved local policy assigns review priority categories.

| Check | Eligibility / exclusions | Recorded contribution / routing basis |
|---|---|---|
| Internal photograph reuse | Eligible saved concern(s) | No numeric contribution. 4 finding(s) cited by the saved local rules policy. |
| External photograph matches | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |

| Check | Eligibility / exclusions | Recorded contribution / routing basis |
|---|---|---|
| Capture metadata | Eligible saved concern(s) | No numeric contribution. 3 finding(s) cited by the saved local rules policy. |
| Content credentials | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Scene, time and place | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Registration reading | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Experimental synthetic image check | Excluded: zero weight | EXCLUDED / ZERO WEIGHT. No contribution to risk. |
| Experimental image editing check | Excluded: zero weight | EXCLUDED / ZERO WEIGHT. No contribution to risk. |
| Garage billing pattern | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Damage and claimed amount | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Shared identifiers | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Earlier inspection link | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |
| Damage history | No eligible concern contribution | No numeric contribution. 0 finding(s) cited by the saved local rules policy. |

Recorded override: Local mode retains desk review; human approval/rejection is separate.

## Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

- Scores are heuristic; independent detection accuracy and claimant intent are not established.
- INR 50,000 is a preserved research billing benchmark; current legal applicability and insurer procedures are unverified.
- Check findings use local computations and recorded observations; they do not establish successful fresh model adjudication.
- Production check implementation revision: production-checks-2026-10-23-v5. This is separate from the recorded agent policy version.

Next reviewer action: request evidence for: incident context, registration reading, damage and claimed amount, shared identifiers, earlier inspection comparison. Human approval/rejection is separate.
