FraudLens

Underwriting / MH12PX4067

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case case-ac757ae6f8b1 · Report 23 Oct 2026, 05:23:42 UTC

Assessment incomplete

Low	Medium	High

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Partial analysis — local checks complete; AI analysis unavailable. Human review required.

Provider availability is an operational limitation, not evidence of customer fraud. Replace photographs only for an identified evidence gap.

One-minute case summary

Underwriting application for MH12PX4067. 6 saved photograph(s); 8 concern observation(s) across 2 check(s). Applicant statements and automated observations require independent review.

Saved evidence preview

SHADOW ONLY · candidate concern R: 0.86 / 1; material evidence coverage C: 33.3%. Unvalidated; production risk and human review unchanged.

Main supported findings

- This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).
- EXIF Software field indicates editing with 'Adobe Photoshop CS Windows'.

Evidence / check coverage — separate from risk

Photographs	Recorded required checks	Required unresolved inputs
6	6 check record(s)	4 unresolved check(s)

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

A recorded result may be unavailable or inconclusive; it does not establish that a measurement succeeded.

Material missing evidence

Scene, time and place, Registration reading, Shared identifiers, odometer_readability

Recommended reviewer action

System routing: desk review. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.

Human decision for this analysis: request more evidence

Submitted facts · Applicant statements

Field	Declared / recorded value
Registration	MH12PX4067
Case type	underwriting
Submitted	22 Oct 2026, 19:46:08 UTC
Applicant	Fictional Panel Applicant
Make	Chevrolet
Model	Classic
Variant	Archived public rental-car sample
Year	2005
Policy reference	FICTIONAL-PANEL-2026
Insured declared value (INR)	500000.0
Applicant declaration	Application type: Break-in Inspection Declared vehicle condition: Unsure; inspection needed FICTIONAL SOFTWARE REHEARSAL with licensed archived 2005 photographs by Milkmandan. No relationship to the real car owner or policy is asserted. Condition is uncertain. The dashboard display is off; mileage has not been established. These archives do not verify current condition, identity, ownership or policy.

Labeled photographs · evidence overview

Slot names are applicant assignments. Exact angle, same-vehicle identity and capture date have not been independently authenticated.

Front left

Odometer

Included in this analysis.

Registration plate

Included in this analysis.

Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

Identity

01 / Registration reading

6 inconclusive

Compare readable registration text with the applicant declaration.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Evidence	Declared plate	Extracted text	Comparison	OCR confidence
Front left	MH12PX4067	Unreadable / not recorded	no_plate_candidate	Not returned
Front right	MH12PX4067	Unreadable / not recorded	no_text_detected	Not returned
Rear left	MH12PX4067	Unreadable / not recorded	no_plate_candidate	Not returned
Rear right	MH12PX4067	Unreadable / not recorded	no_text_detected	Not returned
Odometer	MH12PX4067	Unreadable / not recorded	no_plate_candidate	Not returned
Registration plate	MH12PX4067	Unreadable / not recorded	no_plate_candidate	Not returned

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: OCR detected text but no licence-plate-shaped candidate could be read. Plate legibility is unverified; this is not itself suspicious. OCR ran but detected no text. Plate legibility is unverified; this is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

History and relationships

02 / Internal photograph reuse

2 concern, 4 no concern found

Compare submitted photographs with the indexed internal evidence corpus.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Submitted photograph

Authorized saved reference

Evidence	Measured comparison
Front left	cosine similarity: 1.0; hamming distance: 0; images compared: 4
Front right	cosine similarity: 1.0; hamming distance: 0; images compared: 4
Rear left	cosine similarity: 0.8607; hamming distance: 16; images compared: 4
Rear right	cosine similarity: 0.8754; hamming distance: 30; images compared: 4
Odometer	cosine similarity: 0.7329; hamming distance: 34; images compared: 4
Registration plate	cosine similarity: 0.7252; hamming distance: 40; images compared: 4

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: hamming concern = 8; cosine concern = 0.95; cosine floor = 0.9; cosine inconclusive = 0.88; top k = 10

Interpretation: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00). No matching image found elsewhere in the corpus (closest: linked case, perceptual distance 16, semantic similarity 0.86).

No numeric contribution. 2 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison.

03 / External photograph matches

6 no concern found

Look for matching photographs in the configured external reference corpus.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Evidence	Measured comparison
Front left	cosine similarity: 0.6987; hamming distance: 30; corpus size: 400
Front right	cosine similarity: 0.6938; hamming distance: 30; corpus size: 400
Rear left	cosine similarity: 0.6803; hamming distance: 28; corpus size: 400
Rear right	cosine similarity: 0.672; hamming distance: 30; corpus size: 400
Odometer	cosine similarity: 0.5408; hamming distance: 28; corpus size: 400
Registration plate	cosine similarity: 0.6599; hamming distance: 38; corpus size: 400

No authorized matching reference photograph was saved. No visual match is fabricated.

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: No matching image found in the external image index (closest semantic similarity 0.70). No matching image found in the external image index (closest semantic similarity 0.69).

No numeric contribution. 0 finding(s) cited by the agent.

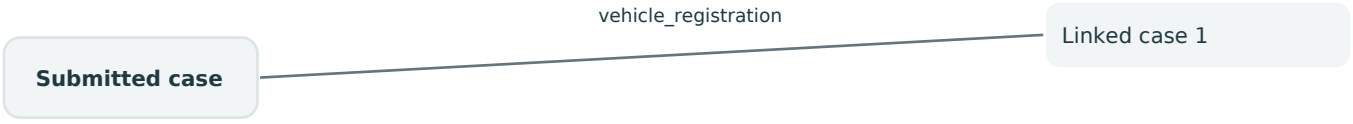

Coverage: material requirement; sufficient for this comparison.

04 / Shared identifiers

1 inconclusive

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence referenced: Case / linked records

1 recorded linked case(s); the graph shows up to four. Shared identifiers have innocent explanations and are not proof of fraud.

Interpretation: This case shares one identifier (vehicle_registration) with linked case. A single shared detail has innocent explanations - a family address, a shared contact number - and is not on its own evidence of a relationship.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

Provenance

05 / Capture metadata

6 concern

Examine extracted capture metadata and its availability or consistency.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Evidence	Captured time	GPS	Camera	Software
Front left	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Front right	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Rear left	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Rear right	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Odometer	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Registration plate	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows

Evidence	Usable comparison
Front left	exif present: True
Front right	exif present: True
Rear left	exif present: True
Rear right	exif present: True
Odometer	exif present: True
Registration plate	exif present: True

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts. An editor tag records software, not what changed or whether a claim is fraudulent.

Interpretation: EXIF Software field indicates editing with 'Adobe Photoshop CS Windows'.

No numeric contribution. 6 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

06 / Content credentials

6 inconclusive

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Evidence / declaration	Recorded observation
Front left	credentials present: False
Front right	credentials present: False
Rear left	credentials present: False
Rear right	credentials present: False
Odometer	credentials present: False
Registration plate	credentials present: False

Interpretation: No embedded C2PA content credentials were found. Authenticity cannot be established from this check; absence is not evidence of fraud.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

07 / Experimental synthetic image check

1 not run

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence referenced: Case / linked records

Saved state	Missing requirement / reason
Not run	Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

08 / Experimental image editing check

6 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

Saved experimental observations	Use in production
6 Inconclusive record(s)	EXCLUDED / ZERO WEIGHT. Raw classifier measurements are retained in the saved record; they are not fraud probabilities.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Digital-edit analysis ran but has not been calibrated against this corpus, so its score is recorded without a verdict.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Context

09 / Scene, time and place

6 inconclusive

Compare available time, place, weather and scene observations.

Evidence referenced: Front left, Front right, Rear left, Rear right, Odometer, Registration plate

No usable measurements were saved.

Structured comparison of saved observations only. No damage boxes, heatmap, map or annotation was available; none has been invented.

Interpretation: Perception data not yet available.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

10 / Experimental baseline check

1 inconclusive

Inspect observations against the actual underwriting declaration.

Evidence referenced: Case / linked records

Saved experimental observations	Use in production
1 Inconclusive record(s)	EXCLUDED / ZERO WEIGHT. Raw classifier measurements are retained in the saved record; they are not fraud probabilities.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. This experimental check assumes an undamaged declaration, which is not established by an underwriting application alone. Review the recorded applicant...

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Checks outside this run’s applicable policy

Registered check	Result / use
Earlier inspection link	Not applicable to this policy / no contribution
Damage and claimed amount	Not applicable to this policy / no contribution
Damage history	Not applicable to this policy / no contribution
Garage billing pattern	Not applicable to this policy / no contribution
Photographic coverage	Not applicable to this policy / no contribution

Candidate assessment — SHADOW ONLY

Unvalidated heuristic comparison. This does not replace production routing, the risk bar or human review. Neither axis is a fraud probability.

Concern index R (0–1)	Material coverage C	Candidate action
0.86	33.3%	request_evidence

R = 1 - product(1 - grouped maximum). C = sufficient applicable material requirements / applicable material requirements. Mandatory gaps prevent candidate clearance regardless of the average.

Correlation group	Saved maximum a × e
provenance	0.3
identity	0.0
image_reuse	0.8
incident	0.0

Worked saved calculation: R = 1 - (0.7) × (1.0) × (0.2) × (1.0) = 0.86. C = 2 / 6 = 33.3%.

Check / group	Strength / parameter	Coverage sufficient
ai_generation / None	0.0 / 0.0	False
baseline_corruption / None	0.0 / 0.0	False
c2pa_credentials / provenance	0.0 / 0.3	False
digital_edit / None	0.0 / 0.0	False
entity_graph / identity	0.0 / 0.4	False
exif_metadata / provenance	1.0 / 0.3	True
external_corpus / image_reuse	0.0 / 0.8	True
internal_duplicate / image_reuse	1.0 / 0.8	True
odometer_readability / None	0.0 / 0.0	False
plate_ocr / identity	0.0 / 0.6	False
scene_consistency / incident	0.0 / 0.6	False

Mandatory gaps: scene_consistency, plate_ocr, entity_graph, odometer_readability. Garage alerts are separate. All candidate operating points are unvalidated.

How the assessment was calculated

The agent selects a routing band from the recorded evidence. Check weights are context, not an additive production score.

Automated decision availability	Effective system routing	Guard / human boundary
No converged model decision. Saved system fallback only.	desk_review	material-evidence-2026-10-22-v3. Human approval/rejection is separate.

Numeric score: not computed. Production model routing does not assign numerical contributions.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Internal photograph reuse	Eligible saved concern(s)	No numeric contribution. 2 finding(s) cited by the agent.

Check	Eligibility / exclusions	Recorded contribution / routing basis
External photograph matches	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Capture metadata	Eligible saved concern(s)	No numeric contribution. 6 finding(s) cited by the agent.
Content credentials	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Scene, time and place	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Registration reading	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Experimental synthetic image check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental image editing check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental baseline check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Shared identifiers	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.

Recorded override: Automated adjudication unavailable or incomplete; desk review required

Recorded override: Material-evidence guard: no converged model decision; fallback routing cannot establish clearance.

Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

Partial analysis: Local checks complete — AI analysis unavailable; human review required. The saved assessment basis is unavailable or unsupported. Automated interpretation did not establish a converged assessment. Required check coverage is incomplete or was not recorded.

- Scores are heuristic; independent detection accuracy and claimant intent are not established.
- INR 50,000 is a preserved research billing benchmark; current legal applicability and insurer procedures are unverified.
- Check findings use local computations and recorded observations; they do not establish successful fresh model adjudication.
- Production check implementation revision: production-checks-2026-10-22-v4. This is separate from the recorded agent policy version.

Next reviewer action: System routing: desk review. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.

Human decision · this saved version: request more evidence
