FraudLens

Claims / MH12RX4082

PRIVATE EVIDENCE REVIEW · SAVED RUN / HISTORICAL RECORD

Case case-167fc4c5e190 · Report 25 Oct 2026, 18:49:44 UTC

Provisional — partial assessment: MEDIUM

Low	**Medium**	High

Category markers do not imply numerical ranges. Scores are not fraud probabilities.

Partial rules-based assessment. Completed eligible concern findings establish a provisional review band. At least one material concern needs independent review. This is an evidence concern category, not a finding of fraud or a clearance. Local checks complete — AI analysis unavailable; human review required. The saved assessment basis is unavailable or unsupported. Automated interpretation did not establish a converged assessment. Required check coverage is incomplete or was not recorded.

Material evidence: 1 / 7 applicable requirements sufficient. Review the cited findings and resolve material gaps: internal_duplicate, scene_consistency, plate_ocr, damage_plausibility, entity_graph, baseline_linkage

Partial analysis — local checks complete; AI analysis unavailable. Human review required.

Provider availability is an operational limitation, not evidence of customer fraud. Replace photographs only for an identified evidence gap.

One-minute case summary

Claims application for MH12RX4082. Declared claim: INR 2,000. 4 saved photograph(s); 6 concern observation(s) across 2 check(s). Applicant statements and automated observations require independent review.

Saved evidence preview

SHADOW ONLY · candidate concern R: 0.86 / 1; material evidence coverage C: 14.3%. Unvalidated; production risk and human review unchanged.

Findings supporting the display band

• Internal photograph reuse [image]: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00).

Evidence / check coverage — separate from risk

Photographs	Recorded required checks	Required unresolved inputs
4	5 check record(s)	6 unresolved check(s)

Optional and zero-weight experimental results are shown separately; they do not create a numerical risk score.

A recorded result may be unavailable or inconclusive; it does not establish that a measurement succeeded.

Material missing evidence

Internal photograph reuse, Scene, time and place, Registration reading, Damage and claimed amount, Shared identifiers, Earlier inspection link

Recommended reviewer action

System routing: desk review. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.

Human decision for this analysis: request more evidence

Submitted facts · Applicant statements

Field	Declared / recorded value
Registration	MH12RX4082
Case type	claims
Submitted	25 Oct 2026, 18:08:23 UTC
Applicant	Fictional Repair Verification
Make	Chevrolet
Model	Classic
Variant	Archived licensed public photograph sample
Year	2005
Policy reference	FICTIONAL-REPAIR-20261025
Claimed amount (INR)	2000.0
Insured declared value (INR)	500000.0
Declared incident location	Fictional declared incident location
Declared incident time	2026-10-24T12:00:00Z
Applicant declaration	FICTIONAL DISPOSABLE SOFTWARE VERIFICATION. Licensed archived photographs by Milkmandan, CC BY-SA 3.0; no current insured loss, ownership or readable mileage established. Provider remains paused. This is a local-check workflow test.

Labeled photographs · evidence overview

Slot names are applicant assignments. Exact angle, same-vehicle identity and capture date have not been independently authenticated.

Vehicle overview

Front registration

Included in this analysis.

Damage overview

Included in this analysis.

Damage closeup

Included in this analysis.

Main findings · check results

Labels distinguish concern, no concern found, inconclusive, unavailable, not run and not applicable. A completed check is not necessarily a clean result.

Identity

01 / Registration reading

4 inconclusive

Compare readable registration text with the applicant declaration.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Evidence	Declared plate	Extracted text	Comparison	OCR confidence
Vehicle overview	MH12RX4082	Unreadable / not recorded	no_text_detected	Not returned
Front registration	MH12RX4082	Unreadable / not recorded	no_plate_candidate	Not returned
Damage overview	MH12RX4082	Unreadable / not recorded	no_plate_candidate	Not returned
Damage closeup	MH12RX4082	Unreadable / not recorded	no_plate_candidate	Not returned

Confidence describes OCR text recognition only. No evidence crop was saved; this report does not fabricate one.

Saved decision parameters: plate ocr confidence concern = 0.5

Interpretation: OCR ran but detected no text. Plate legibility is unverified; this is not itself suspicious. OCR detected text but no licence-plate-shaped candidate could be read. Plate legibility is unverified; this is not itself suspicious.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

History and relationships

02 / Internal photograph reuse

3 concern, 1 inconclusive

Compare submitted photographs with the indexed internal evidence corpus.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Submitted photograph

Authorized saved reference

Evidence	Measured comparison
Vehicle overview	cosine similarity: 1.0; hamming distance: 0; images compared: 30
Front registration	cosine similarity: 1.0; hamming distance: 0; images compared: 30
Damage overview	cosine similarity: 1.0; hamming distance: 0; images compared: 30
Damage closeup	cosine similarity: 1.0; hamming distance: 0; images compared: 30

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: hamming concern = 8; cosine concern = 0.95; cosine floor = 0.9; cosine inconclusive = 0.88; top k = 10

Interpretation: This image matches an image submitted in linked case (perceptual distance 0, semantic similarity 1.00). This image was submitted here first and later resubmitted in linked case (perceptual distance 0, semantic similarity 1.00). The duplication is evidence against linked case, not against this case.

No numeric contribution. 3 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

03 / External photograph matches

4 no concern found

Look for matching photographs in the configured external reference corpus.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Evidence	Measured comparison
Vehicle overview	cosine similarity: 0.6938; hamming distance: 30; corpus size: 400
Front registration	cosine similarity: 0.542; hamming distance: 26; corpus size: 400
Damage overview	cosine similarity: 0.6987; hamming distance: 30; corpus size: 400
Damage closeup	cosine similarity: 0.5399; hamming distance: 28; corpus size: 400

No authorized matching reference photograph was saved. No visual match is fabricated.

Similarity is not proof of reused evidence or claimant intent. Reference images are shown only when frozen from an authorized internal record; external filenames are never opened.

Saved decision parameters: external hamming concern = 8; external cosine concern = 0.95; external cosine floor = 0.9; external cosine inconclusive = 0.88

Interpretation: No matching image found in the external image index (closest semantic similarity 0.69). No matching image found in the external image index (closest semantic similarity 0.54).

No numeric contribution. 0 finding(s) cited by the agent.

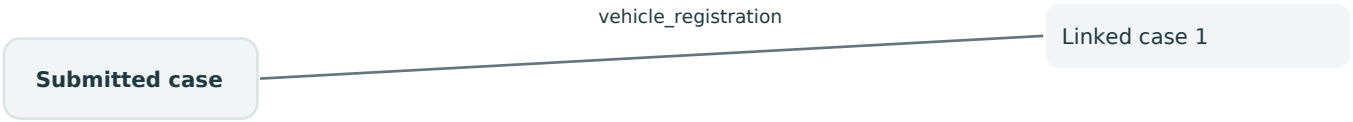

Coverage: material requirement; sufficient for this comparison.

04 / Shared identifiers

1 inconclusive

Inspect recorded identifier relationships; a relationship does not establish intent.

Evidence referenced: Case / linked records

1 recorded linked case(s); the graph shows up to four. Shared identifiers have innocent explanations and are not proof of fraud.

Interpretation: This case shares one identifier (vehicle_registration) with linked case. A single shared detail has innocent explanations - a family address, a shared contact number - and is not on its own evidence of a relationship.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

05 / Earlier inspection link

1 inconclusive

Compare linked underwriting and claims evidence where a baseline exists.

Evidence referenced: Case / linked records

Saved sequence	Date / days before claim	Recorded severity
Observation 1	Not recorded	Not comparable

Dates and severity labels are shown as recorded. No continuous physical damage percentage is inferred from labels or image area. Missing chronology or a comparable scale prevents a severity plot.

Interpretation: No inspection date could be compared against the declared loss.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

06 / Damage history

1 not applicable

Compare recorded damage severity across linked observations.

Evidence referenced: Case / linked records

Saved state	Missing requirement / reason
Not applicable	No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

Interpretation: No earlier claim is on record for this vehicle, so there is no sequence of damage to be inconsistent.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; sufficient for this comparison. No applicable historical comparison is established; this is not a passed history check.

Provenance

07 / Capture metadata

3 concern, 1 inconclusive

Examine extracted capture metadata and its availability or consistency.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Evidence	Captured time	GPS	Camera	Software
Vehicle overview	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Front registration	Not recorded	Not recorded	Not recorded	Not recorded
Damage overview	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows
Damage closeup	Not recorded	Not recorded	Not recorded	Adobe Photoshop CS Windows

Evidence	Usable comparison
Vehicle overview	exif present: True
Front registration	exif present: False
Damage overview	exif present: True
Damage closeup	exif present: True

Missing metadata does not imply manipulation. Capture time and GPS are extracted fields, not independently authenticated facts. An editor tag records software, not what changed or whether a claim is fraudulent.

Interpretation: EXIF Software field indicates editing with 'Adobe Photoshop CS Windows'. This image has no EXIF metadata - common for uploads via WhatsApp, a browser, or a phone's default sharing pipeline. Capture time, location and authenticity remain unverified; absence is not itself suspicious.

No numeric contribution. 3 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

08 / Content credentials

4 inconclusive

Inspect available content provenance credentials; absence is not proof of manipulation.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Evidence / declaration	Recorded observation
Vehicle overview	credentials present: False
Front registration	credentials present: False
Damage overview	credentials present: False
Damage closeup	credentials present: False

Interpretation: No embedded C2PA content credentials were found. Authenticity cannot be established from this check; absence is not evidence of fraud.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

09 / Experimental synthetic image check

1 not run

Experimental synthetic-image screening, excluded where its weight is zero.

Evidence referenced: Case / linked records

Saved state	Missing requirement / reason
Not run	Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Experimental zero-weight model not run in normal operation; it cannot contribute to routing.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

10 / Experimental image editing check

4 inconclusive

Experimental editing screening, excluded where its weight is zero.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Saved experimental observations	Use in production
4 Inconclusive record(s)	EXCLUDED / ZERO WEIGHT. Raw classifier measurements are retained in the saved record; they are not fraud probabilities.

Interpretation: Experimental zero-weight observation, inconclusive for production routing. Digital-edit analysis ran but has not been calibrated against this corpus, so its score is recorded without a verdict.

EXCLUDED / ZERO WEIGHT. No contribution to risk.

Coverage: optional / advisory; does not block material completeness.

Context

11 / Scene, time and place

4 not run

Compare available time, place, weather and scene observations.

Evidence referenced: Vehicle overview, Front registration, Damage overview, Damage closeup

Saved state	Missing requirement / reason
Not run	Perception data not yet available.

Interpretation: Perception data not yet available.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

12 / Damage and claimed amount

1 not run

Assess whether recorded damage observations support the incident account.

Evidence referenced: Case / linked records

Saved state	Missing requirement / reason
Not run	Perception data not yet available.

Interpretation: Perception data not yet available.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: material requirement; evidence remains insufficient.

Economic

13 / Garage billing pattern

1 inconclusive

Summarize the repairing garage billing pattern against a research benchmark.

Evidence referenced: Case / linked records

No usable measurements were saved.

The implemented billing band is a research benchmark, not a verified legal rule. This is a garage pattern, not a claimant fraud probability.

Interpretation: Repairer identity is missing; no garage billing pattern can be attributed.

No numeric contribution. 0 finding(s) cited by the agent.

Coverage: optional / advisory; does not block material completeness.

Checks outside this run’s applicable policy

Registered check	Result / use
Experimental baseline check	Not applicable to this policy / no contribution
Photographic coverage	Not applicable to this policy / no contribution

Candidate assessment — SHADOW ONLY

Unvalidated heuristic comparison. This does not replace production routing, the risk bar or human review. Neither axis is a fraud probability.

Concern index R (0–1)	Material coverage C	Candidate action
0.86	14.3%	request_evidence

R = 1 - product(1 - grouped maximum). C = sufficient applicable material requirements / applicable material requirements. Mandatory gaps prevent candidate clearance regardless of the average.

Correlation group	Saved maximum a × e
vehicle_history	0.0
provenance	0.3
incident	0.0
identity	0.0
image_reuse	0.8

Worked saved calculation: R = 1 - (1.0) × (0.7) × (1.0) × (1.0) × (0.2) = 0.86. C = 1 / 7 = 14.3%.

Check / group	Strength / parameter	Coverage sufficient
ai_generation / None	0.0 / 0.0	False
baseline_linkage / vehicle_history	0.0 / 0.4	False
c2pa_credentials / provenance	0.0 / 0.3	False
damage_plausibility / incident	0.0 / 0.4	False
digital_edit / None	0.0 / 0.0	False
entity_graph / identity	0.0 / 0.4	False
exif_metadata / provenance	1.0 / 0.3	False
external_corpus / image_reuse	0.0 / 0.8	True
internal_duplicate / image_reuse	1.0 / 0.8	False
plate_ocr / identity	0.0 / 0.6	False
scene_consistency / incident	0.0 / 0.6	False
severity_progression / vehicle_history	0.0 / 0.4	True
threshold_gaming / None	0.0 / 0.0	False

Mandatory gaps: internal_duplicate, scene_consistency, plate_ocr, damage_plausibility, entity_graph, baseline_linkage. Garage alerts are separate. All candidate operating points are unvalidated.

How the assessment was calculated

The agent selects a routing band from the recorded evidence. Check weights are context, not an additive production score.

Automated decision availability	Effective system routing	Guard / human boundary
No converged model decision. Saved system fallback only.	desk_review	material-evidence-2026-10-22-v3. Human approval/rejection is separate.

Numeric score: not computed. Production model routing does not assign numerical contributions.

Check	Eligibility / exclusions	Recorded contribution / routing basis
Internal photograph reuse	Eligible saved concern(s)	No numeric contribution. 3 finding(s) cited by the agent.
External photograph matches	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Capture metadata	Eligible saved concern(s)	No numeric contribution. 3 finding(s) cited by the agent.
Content credentials	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Scene, time and place	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Registration reading	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Experimental synthetic image check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Experimental image editing check	Excluded: zero weight	EXCLUDED / ZERO WEIGHT. No contribution to risk.
Garage billing pattern	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage and claimed amount	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Shared identifiers	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Earlier inspection link	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.
Damage history	No eligible concern contribution	No numeric contribution. 0 finding(s) cited by the agent.

Recorded override: Automated adjudication unavailable or incomplete; desk review required

Recorded override: Material-evidence guard: no converged model decision; incomplete assessment cannot route as actionable clearance.

Material limitations and next reviewer action

Coverage measures execution, not risk. Missing metadata is not proof of manipulation; similarity and shared identifiers are not proof of fraud. Automated routing is separate from human approval or rejection.

Partial analysis: Completed eligible concern findings establish a provisional review band. At least one material concern needs independent review. This is an evidence concern category, not a finding of fraud or a clearance. Local checks complete — AI analysis unavailable; human review required. The saved assessment basis is unavailable or unsupported. Automated interpretation did not establish a converged assessment. Required check coverage is incomplete or was not recorded.

- Scores are heuristic; independent detection accuracy and claimant intent are not established.
- INR 50,000 is a preserved research billing benchmark; current legal applicability and insurer procedures are unverified.
- Check findings use local computations and recorded observations; they do not establish successful fresh model adjudication.
- Production check implementation revision: production-checks-2026-10-23-v5. This is separate from the recorded agent policy version.

Next reviewer action: System routing: desk review. Review the evidence and missing inputs; request specific new evidence before relying on an incomplete assessment.
